

Visitor Safety for Website/Facebook page

Top Master operates using an indoor slab viewing A-frame and an outdoor remnant yard. Please keep in mind that this is an active work area with safety hazards including moving forklifts and A-frames that hold heavy stone materials. We ask that all of our customers viewing material wear **closed toe shoes** to their viewing appointments. We want to keep all visitors safe so Top Master will provide and require customers to wear personal protective equipment (PPE) before entering the slab viewing A-frame and/or outdoor remnant yard for their safety.

Children 18 and under are not permitted inside our indoor slab showroom. A child may stay in the waiting area with an adult or if they are old enough by themselves. Entering the slab showroom includes infants that must be carried or children in strollers. Children are permitted in the remnant yard if accompanied by an adult and sales representative. Young children must be secured in a stroller and/or maintain constant physical contact with the child. This policy must be strictly enforced. Unfortunately no exceptions can be made. Customer's safety is important to us.

To assure our customers have a safe visit to our facility, customers must acknowledge a waiver that outlines precautions and safety. Once the waiver is signed by our customer It will be kept on file. We ask that Top Master Visitors are always aware of your surroundings while visiting us.

We appreciate your understanding and cooperation. Top Master wants to provide a safe visiting place for you and your family. If you have any questions, please do not hesitate to contact Top Master.
